TWP Natural Effect finish is designed for use on:

LOG HOMES

OUTDOOR FURNITURE

DECKING

OUTDOOR STRUCTURES

TWP® is manufactured and distributed by Gemini Industries, Inc.

TWP Natural Effect Finish is:

- **WATERBASED**
- **VIRTUALLY ODOR FREE**
- **SUPER EASY TO APPLY**
- **SIMPLE TO MAINTAIN**

*Waterbase Impregnating
Stain, Teak*

*Waterbase Impregnating
Stain, Mahogany*

*Waterbase Impregnating
Stain, Black Ebony*

*Waterbase Impregnating
Stain, Walnut*

*Waterbase Impregnating
Stain, Dark Walnut*

*Waterbase Impregnating
Stain, Chestnut*

EASY TO APPLY

Impregnators are easily applied by brush, roller, pump sprayer or traditional spray equipment. As with any waterborne system technology, they go on milky and they “clear” as they dry. No matter how inconsistently or unevenly applied, the color is perfectly even when dry. Special caution should be used in not allowing the impregnator to get on surrounding window frames, masonry, etc. as they penetrate so well that they cannot be removed.

PERFORMANCE

Sirca Impregnators are tinted with iron oxide pigments, contain UV absorbers and are extremely resistant to solar radiation. Their function is to preserve the wood from degradation (UV light, microorganisms, etc.), thus preventing the change in color of the wood, in addition to promoting adhesion of the Natural Effect Finish
